KISS – Keep It Simple, Stupid

• Person to Person works best for quick, problem resolution. Issues to consider:
  – What can be done informally and what can’t
  – Trusting, professional relationships are key and built on common interests
  – Not just the ‘big boss’. Involve deputies for continuity and succession
  – Start small and use whatever tool is easiest – SMS, WhatsApp, Skype or even boring old email
  – Success breeds success
When it isn’t simple ...

• Formal cross-border sharing requires an investment of time:
  – Focus on what can be achieved. What does your legal context allow you to do now?
  – What other agendas might your sharing support? Border security? Access to entitlements?
  – Find common ground. You don’t have to do the same with each country.
  – Be tactical and agile. Make a small step now, show success and then take the next step.
