

Developing Resilient CRVS Systems: Facilitating the Recovery from Covid-19 in Indonesia

Muhammad Cholifihani
Director of Population and Social Assurance
Ministry of National Development Planning/Bappenas

9 March 2022

Indonesia's CRVS National Strategy toward Universal Registration

CRVS addressed in the National Medium-Term Development Plan (Presidential Regulation No. 18/2020 on The 2020-2024), i.e. 100% ownership of: ID & Birth Certificate, Marriage & Divorce Certificates, Death Certificate & record of the causes of death.

Comprehensive multisectoral CRVS National Strategy was endorsed through Presidential Regulation No. 62/2019.

The National Strategy contains clear targets to be achieved by 2024, partly aligned with the three goals and targets of the Regional Action Framework.

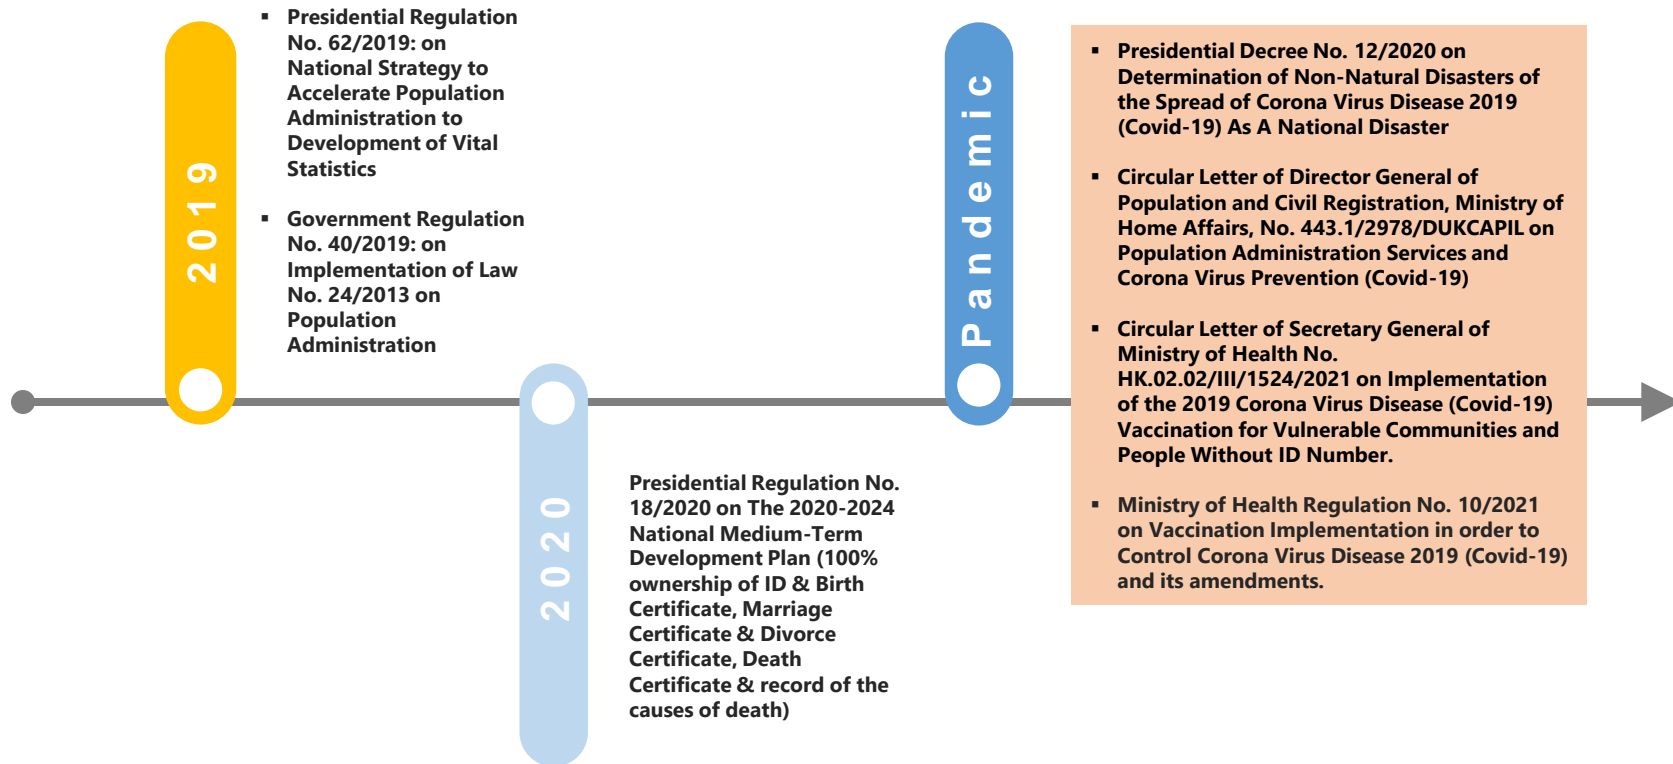

The National Strategy pinpoints supply and demand sides to achieve universal registration:

- The number of registration points and their geographical coverage.
- The human resources attributed to civil registration
- The simplification of the procedures through innovative approaches
- Enhancing stakeholders awareness.

Progress to date: CRVS National Strategy

No.	Indicator (%)	Target 2024	Target 2020	Progress 2020	Progress 2021
1	Coverage of NIK (ID number) ownership in children of Indonesian citizens aged 0-5 years .	99%	90%	-	-
2	Coverage of NIK (ID number) ownership in Indonesian citizens aged 0-17 years .	99%	95%	-	-
3	Coverage of NIK (ID number) ownership for all Indonesian citizens	99%	98%	99.11% (MOHA)	97.62%% (Semester I)
4	Coverage of birth certificates for children aged 0-5 years	100%	95%	-	-
5	Coverage of birth certificates ownership for residents aged 0-17 years .	100%	90%	93.78% (MOHA)	93.06% (Semester I)
6	Coverage of ownership of marriage books and marriage certificates for all married couples.	100%	Increased	39.89% (MOHA Sem. II)	(data incomplete)
7	Coverage of ownership of divorce certificates for all divorced individuals	100%	Increased	43.77% (MOHA Sem. II)	(data incomplete)
8	The coverage of ownership of a death certificate for all events of death in the past year.	100%	Increased	4,665,664 people (Semester II 2020)	(data incomplete)
9	Coverage of death events identified as the cause based on the International Classification of Diseases-10 (ICD10) in the past year	100%	Increased	Some areas have implemented	

Indonesian Regulations during Pandemic

Facilitating the Recovery from Covid-19 in Indonesia: Good Practice

CRVS data to calculate the number of **vaccine doses needed** and **budget planning** for social assistance.

Integrated data of CRVS for **registration, implementation** of Covid-19 vaccinations, and issuance of digital Covid-19 **vaccine certificates (PCare and PeduliLindungi)**.

Integrated data of CRVS to provide **social assistance** to beneficiary with a verified ID Number.

Simplified and improved the Standard of Procedure (SOP) of civil registration.

Registration of **birth, death, still birth** and recording of **causes of death** continue as a **priority**, however certain registration processes may be temporarily delayed.

The increased of **digital transformation and innovation** of public service on CRVS.

In some areas, **integrated** civil registration with **primary healthcare services**.

Conclusion and Recommendation

- ❖ CRVS system should be considered as part of national disaster planning which involve multisector.
- ❖ Civil registration systems and the vital statistics must be strengthened as core components of the response to Covid-19.
- ❖ Building resilience into CRVS systems will be essential for better function during future disaster. Importantly, focus on:
 - ✓ efficient human resources arrangements for civil registration
 - ✓ community awareness and active participation from public (inclusivity)
 - ✓ improved interoperability and intersectoral collaboration
 - ✓ enhanced digitization of CRVS operations; and
 - ✓ the availability and quality of mortality statistics to monitor the impact of the pandemic.
- ❖ To conduct study of the impact of Covid-19 on CRVS and how to strengthen CRVS system after pandemic.
