Leaving No One Behind – Civil Registration and Vital Statistics as an Accelerator for Achieving the 2030 Agenda for Sustainable Development

CRVS to accelerate SDGs: Snapshot of Indonesia case

Muhammad Cholifihani
Director for Population and Social Security
Ministry of National Development Planning/BAPPENAS

6th CRVS Regional Steering Group Meeting

8-9 December 2020
Indonesia is on the Right Track to Achieve its 2020 Target for Birth Registration

National Target: Birth certificate for 92% of all children (0-17) in 2020

86.1% of all children (0-17) in the national sample reported that they have a birth certificate (National Survey SUSENAS 2019)

MOHA MIS system SIAK recorded 91.% birth certificate ownership (December 2020 Outlook)
The Slow Progress is due to **Inequality Issue**

**LEGEND**

Accessibility, Institutional Capacity (human resources and financial support), and Infrastructures as supply side challenges

1. MOHA operates over a very wide range (over 500 districts that cover over 75,000 villages).
2. Geographical conditions are the biggest challenge.
3. Information system support needs to be upgraded.
4. Many regional offices are lacking of sufficient and capable officers.
Demand side challenges include capacity to access services, lack of knowledge on the importance of documents, and socio-cultural practices.

In general, 67.38% of children 0-17 years old have and can show their BC. Meanwhile 18.63% of them have BC but cannot show it, 13.71% of them don’t have BC and 0.28% of them don’t know their BC

(National Survey)
Purpose:

1. To do civil registration and population registration continuously, universally, and inclusive.
2. To realize documents and legal identity ownership that are complete and relevant to all residents.
3. Providing qualified, accurate, complete, and timely vital statistics.
There are multiple agencies and authorities involved in the CRVS system in Indonesia.

Home Affairs holds the main authority and it needs support from the system that involves over a dozen other ministries, different administrative levels, and their frontline services where vital events intersect.
Outreach model by MOHA which focuses on targeting remote areas and hidden population, socially excluded individuals, and children with disabilities to accelerate SDGs target as well.
THANK YOU
