Dr Chev Mony
Deputy Director
Department Planning and Health Information,
Ministry of Health, Cambodia
INTRODUCTION

Socio-economic

- Population: 15,288,489, Male: 48.7%; Female: 51.3% (Cambodia Census 2019)
- Population Annual Growth Rate: 1.4% (Cambodia Census 2019)
- Crude Birth rate is 37.73% (Cambodia Census 2019)
- Total Fertility rate is 2.51% (Cambodia Census 2019)
- The maternal mortality ratio is 141 per 100,000 live births (Cambodia Census 2019)

CRVS status

- Percentage of births were registered in 2020 = 86.41% (GDI/Mol)
- Percentage of deaths were registered in 2020 = 50.06% (GDI/Mol)
CRVS Legal Status in Cambodia

- Sub decree 103 for CRVS implementation dated 19 December 2000—CRVS started 2002
- MPA (Minimum Package of Activities) for health centers, MoH 2018
- CPA (Complementary Package of Activities for hospitals, MoH 2014
- Current CRVS ID draft law –on process
Leadership and Governance

Cambodia have National Governance Structure to oversee CRVS implementation

• CRVS National Steering Committee on CRVS and Identification (NSCI) Chaired by Deputy Prime Minister, Minister of Ministry of Interior, consist of ministry members (NIS/MoP, MOH)

• CRVS National Technical Committee chaired by General Director of General Department of Identification (GDI)

• Law Drafting Working Group co-chaired by Secretary of State, Ministry of Justice and Secretary of State, MoI —working on CRVS ID draft law

• Core Team consist of three Ministries (GDI/Mol, NIS/MoP and MoH)—working on CRVS Improvement Framework
Current Draft CRVS ID law: Role of Health Sector in Improving Birth and Death Registration

- Health facilities will be responsible for issuing birth and death notification for the purpose of civil registration.
- Health facilities will be responsible for completing medical certification of cause of death (for facility deaths and outside of HF if possible).
- Health facility will ensure that cause of death information is shared with the registrar (GDI-General Department of Identification/MoI).
- Health facility will ensure that foetal death information is shared with the NIS (National Institute of Statistics).
Working on strengthening Health-CR in 3 fronts

1. More active role from health sector to notify vital events to increase registration rates
2. Improving quality and accuracy of Cause of death information and foetal death to produce reliable and usable Vital Statistics
3. Ensuring data sharing, interoperability of system to guarantee timely flow of data between CR, Health and Statistics
Link CR and Health data flow
