DIGITAL POPULATION ADMINISTRATION SERVICES HAVE BEEN ACCOMMODATED IN THE INNOVATIONS CONDUCTED BY DUKCAPIL
Source: Director General of Population and Civil Registration, MOHA
DIGITAL IDENTITY

Residents Identification in a digital format which can represent individuals' data in a unique and reliable digital application, and can be physically connected with e-KTP (electronic National ID Card).

DIGITAL IDENTITY IMPLEMENTATION

TOTAL 701,462

Family Data
List of family members who are registered as active in SIAK (Civil Registration System)

TTE
Electronic signature from users (residents)

Document
Civil registration documents such as National ID Card, Family Card, have been signed with electronic signature.

Services
Civil registration services

Activity History
Activity data carried out by Digital Identity application users

Service Monitoring
Monitoring of civil registration service process based on the service applied.
Opportunities

- Easing the process of verifying personal data for accessing public services.
- Assisting the verification process and cross-sector data sharing for planning and development programs (e.g. Civil Registration - Health Data linkage).
- Facilitating the management and storage of population data.
- Strengthening the development of CRVS in Indonesia.

Challenges

- Indonesia has a large and diverse geography, so access to services has not yet reached all areas.
- The infrastructure supporting digital identity is not yet evenly distributed and does not reach every individual, especially vulnerable groups.
- Data privacy and protection policy.
- Civil registration service is still not universal (recording all individuals, especially vulnerable group)
THANK YOU
